Thinking In Systems
Automating Real-World Tasks with Python
AI for Brainstorming and Planning

Dandy Zain

Quality Code, Inspired Design: Shaping the Digital World with Precision and Creativity.
Jakarta Utara, Jakarta Raya, Indonesia

Ringkasan

I am a Developer with experience in web and mobile application development. I have expertise in building applications using Laravel and Express.js for the backend, as well as JavaScript frameworks like React, Vue, Next.js, and Nuxt.js for the frontend. On the mobile side, I develop applications using Flutter and Kotlin, ensuring they run smoothly across multiple platforms with optimal performance.

I enjoy tackling technical challenges and finding innovative solutions to create fast, responsive, and user-friendly applications. With a full-stack approach, I can handle projects from backend to frontend, including API integration, deployment, and performance optimization.

I am always eager to learn and implement new technologies, ensuring that the applications I build follow the best practices in development.

Let's connect and create something amazing together!

Pengalaman

PT Infrastruktur Telekomunikasi Indonesia (Telkominfra)
Full Stack Developer
Februari 2024 - Present (2 tahun 8 bulan)
Jakarta Raya, Indonesia

PT. Bay Pacific Software Group
